

April 2, 1974

deficiency bill totaled \$1,762,887. Basically it has to do with the Supreme Court, University Department of Administrative Services and a shift of money under the voc-tech system because we passed LB533. Now I'd like to go over the major items and see if there's any questions.

PRESIDENT: All right, Senator Marvel is asking for any questions?

SENATOR MARVEL: No, the increased costs of the district courts added \$101,000. The increased costs of utilities on the Lincoln camps, \$619,000. The loss of tuition revenue at the Lincoln campus \$275,000. The increased cost of utilities on the Omaha campus, \$61,000. Loss of tuition is about \$124,000. The increased cost of utilities at the Med School, Med Center, \$167,000. The unrealized professional fee revenue which was or is \$344,000, which is a calculation made by the Governor's staff when the budget was adopted a year ago. Cash fund increases -- Wayne State College, \$118,000. University of Nebraska-Lincoln, as a result of a Peat, Marwick & Mitchell audit report, \$124,000. University of Nebraska Med Center, Peat, Marwick & Mitchell report, \$189,000. The voc-tech figures, one is \$354,000 and the other is \$251,000. Those are the major items, Mr. President.

PRESIDENT: Senator Carpenter.

SENATOR CARPENTER: I'd like to have a dialogue with Senator Marvel or the Appropriations Committee.

SENATOR MARVEL: I'll try.

SENATOR CARPENTER: Well, let's go down to Item 52-2. The loss of tuition revenue of \$193,000. Did you lose or was there a loss of \$123,000?

SENATOR MARVEL: Yes, sir.

SENATOR CARPENTER: That's what we're trying to make up.

SENATOR MARVEL: Yes, and this has to do with the, let's see, it's LB408 was the Speaker's bill of I think two years ago, and it has to do with the fact that they counted on non-resident tuition and some of the students that they thought would bring in non-resident tuition, it turns out established residency and therefore, this was a reduction in the tuition figures.

SENATOR CARPENTER: Well, that's the result of the court's opinion that you couldn't charge more for out-of-state than you do in-state? Did the Supreme Court rule that sometime in the past?

SENATOR MARVEL: I think it's the...I think it's the court's decision that they can establish residency. As I recall before, you could...the only way you could establish residency was to have four consecutive months of residency which meant that you had to lay out one semester. And the court decision has liberalized the method of establishing residency. This is my understanding.

SENATOR CARPENTER: Now, in 51-12, \$275,000, was that the same circumstance?

SENATOR MARVEL: Yes, sir, on the Lincoln campus.
